Explain why you need this overload and how you will manage this increase in workload.						
I got accepted to Barrett Honor College, which requires me to take HON 370 this Spring semester. I am filling out this form in order to fulfill this requirement and keep a slot in Barrett. I am confident to manage 19 credits effectively. I have experience being on top of classes and online courses, and since I will only work part-time, I can dedicate all my free time to school. Besides, I have experience with all the current-semester material, through projects and work during community college, so it is easier for me to catch up with classes.						
List courses for which you are already registered in the term you are requesting the overload.
